Muhammad Fahad, BS.SE | Developer

Flutter Developer Professional

fa8589364@gmail.com +923018920989 www.linkedin.com/in/muhammad-fahad Pakistan

PROFESSIONAL SUMMARY

- An experienced Flutter developer with a flexible approach, having more than two years of diverse and enriched experience in mobile app development, UI/UX design, and state management. Well-versed in building cross-platform applications, optimizing performance, integrating APIs, and employing best practices in mobile development.
- Aiming to pursue a position in an organization that would put forward challenges and recognition, with an opportunity to grow as a software professional and employ my abilities in contribution to the organization's

CORE STRENGTHS & ENABLING SKILLS

- Dart & Flutter
- Android Studio & Visual Studio
- Figma to Flutter code Converting
- MVVM
- State-management (Provider & Get-X
- Firebase & Fire-Store
- Restful API integration
- Local data storage (Shared preferences, Hive)
- Problem Solving
- Git & Git-Hub
- Effective communicator
- Collaborative team player
- Multitasking & meeting deadlines

PROFESSIONAL EXPERIENCE

Codesier Software House

May 2024- Present

Flutter Developer
My major responsibilities in this role include:

- **Experienced Flutter Developer** with a proven ability to lead mobile app projects from concept to completion. Successfully developed an attendance-based application at Codesier Software House.
- **Solely developed and led** the design and implementation of an attendance-based mobile application, which included real-time face recognition and geolocation tracking features to enable employees to check in, check out, and track break times efficiently.
- **Integrated location-based services**: Configured geoforcing functionality that alerts users when they are outside the predefined radius of the office location, ensuring location accuracy and timely attendance tracking.
- **Enhanced user engagement** by implementing seamless face recognition workflows using advanced facial detection algorithms, delivering a smooth and efficient user experience for attendance tracking.
- **Project Planning and Execution**: Collaborated with project stakeholders to understand requirements, define technical Specifications, and ensure delivery of a high-quality product aligned with business needs.
- **API Integration**: Integrated RESTful APIs for secure communication between the mobile application and backend services, ensuring reliable data synchronization and real-time updates.
- **Performance Optimization**: Optimized the application's performance through efficient state management and best coding practices, reducing load times and enhancing overall usability.
- **Mentorship and Training**: Guided junior developers in the team by sharing best practices and conducting code reviews, fostering a collaborative environment that supported skill development and project success.
- **Regular Progress Updates**: Coordinated with project managers and stakeholders to provide timely updates on milestones, challenges, and resolutions, ensuring transparency and smooth project delivery.

WEBLOX Software House

Feb 2024 – May 2024

Flutter Developer
My major responsibilities in this role in multiple departments include:

Hostel Applications (Website to App through API)

- I developed a **Hostel Management App** to streamline administrative tasks for hostel managers, including room allocation, rent tracking, and maintenance requests. The app features automated vacancy tracking, tenant management, and a centralized platform for handling maintenance concerns. It also integrates a secure payment system, allowing tenants to pay rent online while hostel managers can track payments and generate reports on hostel performance.
- The **Hostel Owner App** was designed to give owners full control over their properties. It provides real-time insights into occupancy rates, rental income, and maintenance status. The app allows owners to monitor rent payments, send reminders, assign maintenance tasks, and communicate directly with tenants and staff. This ensures smooth operations and helps owners make informed decisions on property management.
- The **Hostel Tenant App** was built to enhance the tenant experience, offering easy access to room details, rent payments, and maintenance requests. Tenants can pay their rent securely through the app, receive notifications about payment due dates, and submit service requests. The app fosters a sense of community by enabling tenants to participate in hostel announcements and events, improving their overall living experience.

CODE33HAND Software House

Nov 2023 – Feb 2024

Flutter Developer
My major responsibilities in this role in multiple departments include:

Dynamic E-commerce Application (Website to App through API)

- I developed a **Dynamic E-commerce Application**, transforming a feature-rich website into a responsive mobile app that enhances the online shopping experience. The app provides users with a seamless transition from browsing products on the website to engaging with them in a mobile environment. It features real-time synchronization with the website, ensuring product catalogs, prices, and offers are always up to date. Additionally, the app offers secure payment gateways and personalized shopping experiences through user-specific recommendations.
- For **store owners**, the app allows complete control over their inventory, orders, and customer engagement. It includes tools for product management, order tracking, and analytics to monitor sales performance. Owners can also leverage in-app notifications to update customers on promotions, new arrivals, and order status, enhancing customer retention and satisfaction.
- The **customer-facing** side of the app emphasizes a smooth, intuitive shopping journey, with features like quick product search, wish lists, and one-click purchasing. Integrated push notifications keep customers informed about discounts and new products, while the in-app cart syncs across devices, enabling a consistent shopping experience whether users are on the website or the app.

Freelancing Projects

Aug 2022 – Present

- FYP Project (Mr. Sports)
- Chatting App
- Grapplur.com
- Store App
- Facebook, YouTube, WhatsApp and Instagram UI
- Velaretail.com

QUALIFICATIONS

- BS.SE | City University Of science and Information Technology, Peshawar Pakistan

CERTIFICATIONS

- Certification in Flutter Training Program | The Institute of Beta Byte Tech, Peshawar, Pakistan.
- Certification in Android App Development | The Institute of Codsoft, (Remote), Pakistan.
- Certification in Flutter Development | The Software House of CODE33Hand, (Internship) Islamabad, Pakistan.
